Setting		Details

Sender Details	Auto Display IBN Detail
Import/export file format changes	
Transaction	Data fields
None	None

Notes

New Menu

=====

iSupply version 9 sees a new the introduction of a new menu system.

On succesful login to iSupply, you will see the old iSupply Menu form has been replaced with a modern navigation pane. To ease the transition to the new menu system, all iSupply programs have maintained their original positioning within the menu structure.

In addition, all forms have been given a new look which can be toggled on and off. To turn the new form styling on, add the following text to the <appSettings> node of iSupplyWindows.exe.config file.

```
<add key="UseVisualStyling" value="Yes" />
```

Contact support@lsi.net.au for assistance.

Couriers Please changes

=====

The Couriers Please electronic manifest includes "unit type" data to identify the the type of pack unit despatched.

In previous iSupply versions, this data was obtained from: Maintenance Files >> Company tab >> Pack Unit Details >> Pack Unit Code

This version sees the introduction of a translation table to allow a singleiSupply Pack Unit code to translate to mutiple, Transporter specific Pack Unit codes. For example, the following iSupply Pack Unit codes can be translated to the following transporter codes:

iSupply Pack Unit Code	Transporter 1	Transporter 2	Transporter 3
Box1	CTN	C	Box
Box2	CTN	C	Box
Pall1	PAL	P	Skid

For Couriers Please, the following unit types are required:

Unit type	Description
CTN	Carton
PAL	Pallet
SAT	Satchel

To setup translations, go to: Maintenance Files >> Transporter tab >> Transporter Export Code and setu

For Couriers Please assign each iSupply Pack Unit (used with Couriers Please) to its appropriate Couriers Please unit type (CTN, PAL or SAT).

Start Track version 8.6

=====

The new star track specification has been added along side the old star track specification. To change your Star Track transporter records to use the new specification - follow the iSupply Help for Star Track v8.6

iSupply install steps for this release when upgrading from iSupply version 8.27.1.1

Preparation

1. Ensure all users are logged out of iSupply and cannot log in.
2. Stop the eCS service on the server that runs it.
3. Stop any external processes that may access the iSupply database.
4. Make a backup copy of the iSupply SQL database.

Application server (x86)

1. Uninstall the currently installed iSupply Windows version via Control Panel.
2. Uninstall the currently installed iSupply eCS Service version via Control Panel.
3. Install iSupply Windows 9-1-1-1.msi by running "setup.exe".
4. Ensure that the configuration file "C:\Program Files\LSI\iSupply Windows\iSupplyWindows.exe.config" has been updated with the server and database names.
5. Install iSupply eCS Service 9-1-1-1.msi by running "setup.exe".
6. Ensure that the configuration file "C:\Program Files\LSI\iSupply eCS Service\iSupplyeCSService.exe.config" has been updated with the server and database names.

Application server (x64)

1. Uninstall the currently installed iSupply Windows version via Control Panel.
2. Uninstall the currently installed iSupply eCS Service version via Control Panel.
3. Install iSupply Windows 9-1-1-1 x64.msi by running "setup.exe".
4. Ensure that the configuration file "C:\Program Files\LSI\iSupply Windows\iSupplyWindows.exe.config" has been updated with the server and database names.
5. Install iSupply eCS Service 9-1-1-1 x64.msi by running "setup.exe".
6. Ensure that the configuration file "C:\Program Files\LSI\iSupply eCS Service\iSupplyeCSService.exe.config" has been updated with the server and database names.
7. NGEN iSupply Windows
 - 7.1. Place the files "ngen.exe" and "NGENiSupplyWindows.bat" into iSupply's installation directory (Default: "C:\Program Files\LSI\iSupply Windows\Client").
 - 7.2. Run the NGENiSupplyWindows.bat from command prompt as an Administrator
8. NGEN iSupply eCS Service
 - 8.1. Place the files "ngen.exe" and "NGENiSupplyeCSService.bat" into iSupply's installation directory (Default: "C:\Program Files\LSI\iSupply eCS Service\Client").
 - 8.2. Run the "NGENiSupplyeCSService.bat" from command prompt as an Administrator

Web server (x86)

1. Uninstall the currently installed iSupply Web Services version via Control Panel.
2. Uninstall the currently installed iSupply Web version via Control Panel.
3. Install iSupply Web Services 9-1-1-1.msi by running "setup.exe".
4. Ensure that the configuration file "C:\inetpub\wwwroot\iSupplyWebServices\Web.config" has been updated with the server and database names.
5. Install iSupply Web 9-1-1-1.msi by running "setup.exe".
6. Ensure that the configuration file "C:\inetpub\wwwroot\iSupplyWeb\Web.config" has been updated with the URL of the iSupplyWebServices.

Web server (x64)

1. Uninstall the currently installed iSupply Web Services version via Control Panel.
2. Uninstall the currently installed iSupply Web version via Control Panel.
3. Install iSupply Web Services 9-1-1-1 x64.msi by running "setup.exe".
4. Ensure that the configuration file "C:\inetpub\wwwroot\iSupplyWebServices\Web.config" has been updated with the server and database names.
5. Install iSupply Web 9-1-1-1 x64.msi by running "setup.exe".
6. Ensure that the configuration file "C:\inetpub\wwwroot\iSupplyWeb\Web.config" has been updated with the URL of the iSupplyWebServices.

Database server

1. Run the following database update script(s) (using SQL Server Management Studio) to update the iSupply database: DB9-1-1-1.sql.

Finalisation

1. Test run iSupply.
2. Start the eCS service on the server that runs it.
3. Start any external processes that may access the iSupply database.
4. Allow users to login to iSupply.
